

TREE

Vigour: Very high

Habit: Moderately spreading

Self-compatibility: Yes

Productivity: High

Level of thinning: Medium-high

Flowering date: ~ 15 March

Resistance to Sharka: No (tolerance on fruit)

FRUIT

Ripening date: ~ 25 June

Fruit weight: 73.1 g

Firmness: High

Skin colour: Yellow (orange blush)

Flesh colour: Light orange

Sugar content: 13.1 °Brix

Acidity: 1.25 g/100 ml

Excellent suitability for canning

* Flowering and ripening time at Cieza (Murcia) at 270 meters of altitude.

* Average values obtained in our experimental farm. This information may vary depending on climatic conditions and orchard management.

* Evaluation of resistance to Sharka has been made with the isolated RB-3.30 IVIA of the strain PPV-D under controlled greenhouse conditions for at least four growing seasons and in field conditions for a three years. Information summarizes the results obtained to date.

* Varieties are registered and only can be distributed by licensed nurseries for CSIC.
