

Mirlo Rojo®

TREE

Vigour: Very high

Habit: Moderately spreading

Self-compatibility: Yes

Productivity: High

Level of thinning: Medium

Flowering date: ~ 27 February (low chilling)

Resistance to Sharka: Yes

FRUIT

Ripening date: ~ 18 May

Fruit weight: 70 g

Firmness: Very high

Skin colour: Light orange (red blush)

Flesh colour: Light orange

Sugar content: 13.2 °Brix

Acidity: 1.34 g/100 ml

* Flowering and ripening time at Cieza (Murcia) at 270 meters of altitude.

* Average values obtained in our experimental farm. This information may vary depending on climatic conditions and orchard management.

* Evaluation of resistance to Sharka has been made with the isolated RB-3.30 IVIA of the strain PPV-D under controlled greenhouse conditions for at least four growing seasons and in field conditions for a three years. Information summarizes the results obtained to date.

* Varieties are registered and only can be distributed by licensed nurseries for CSIC.
