* Flowering and ripening time at Cieza (Murcia) at 270 meters of altitude.

* Average values obtained in our experimental farm. This information may vary depending on climatic conditions and orchard management.

* Evaluation of resistance to Sharka has been made with the isolated RB-3.30 IVIA of the strain PPV-D under controlled greenhouse conditions for at least four growing seasons and in field conditions for a three years. Information summarizes the results obtained to date.

* Varieties are registered and only can be distributed by licensed nurseries for CSIC.
